

The Environmental Policy Electrolux

We want our products, services and production to be part of a sustainable society.

We are committed to:

Designing products to reduce their adverse environmental impact in production, use and disposal.

Reducing resource consumption, waste and pollution in our operations.

Taking a proactive approach regarding environmental legislation that affects our business.

Encouraging suppliers, subcontractors, retailers and recyclers of our products to adopt the same environmental principles as Electrolux.

Giving appropriate weight to this environmental policy when making future planning and investment decisions.

Setting targets and objectives, within the scope of the environmental management system, to achieve continual improvement and a sustainable development.

Each business sector manager is responsible for implementing the policy.

The Environmental Policy was first published in April 1994 and updated in 1995 and 2005.

Electrolux Group Management adopted this environmental policy on September 10, 2001.
